officina dell' autonomia

HI, I AM Wally

# Standing frame WALLY

FOR UPRIGHT POSITION, PRONE OR SUPINE

WALLY standing frame has been designed to allow the child to exercise the **upright position**, **prone or supine**, according to the chosen **therapeutic targets.**

**BIEMME GROUP SRL**
VIA UGO LA MALFA, 5 - 42048 RUBIERA (RE) - ITALY
tel. +39 0522 1493390 - commerciale@biemmegroupsrl.it

# STANDING,
# A PROJECT FOR BETTE QUALITY OF LIFE

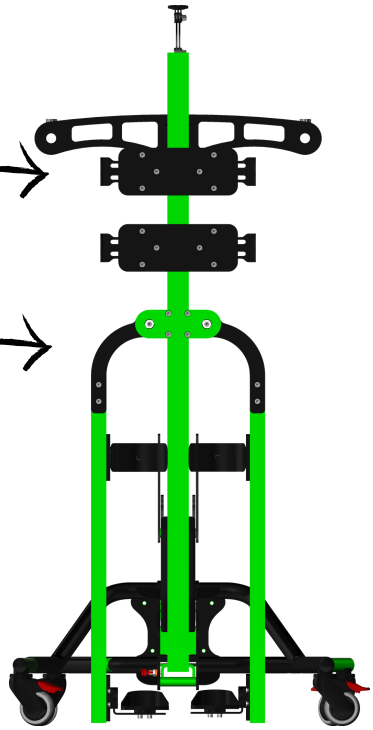
By means of **different configurations and adjustments**, WALLY can be customized to suit the needs and specific goals of the child's therapy.

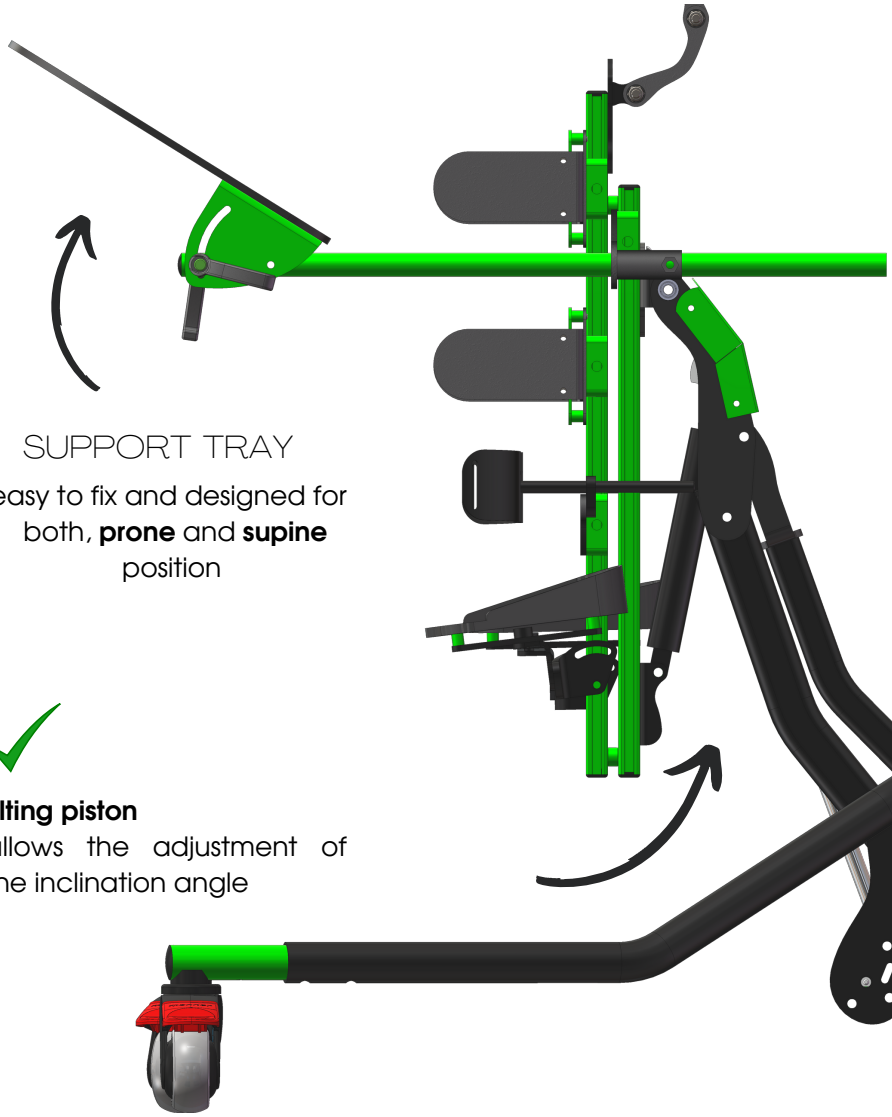
## THORACIC–DORSAL SUPPORT

The **spherical joint** mechanism enables the thoracic-dorsal support to follow the child's **body line and posture.**

## LOWER LIMBS SUPPORT

**Standing in abduction** increases the opportunity for the head of the femur to locate into the hip. The size BIG of WALLY has lower limbs supports **adjusted individually**, with rage from 6° to 70° degrees.





## SUPPORT TRAY

easy to fix and designed for both, **prone** and **supine** position

**tilting piston**
allows the adjustment of the inclination angle

**lift piston**
brings the frame to different heights from the floor
