"THE SUPREME FRUIT OF
SELF-SUFFICIENCY IS
FREEDOM."

EPICURO

Autonomous **propulsion** helps to develop **locomotor skills** of the upper limbs and encourages development of **cognitive** functions, **visuospatial functions** and awareness of the surrounding space.

Acquiring new skills and competences **increases self-esteem** and contributes to find a proper expression of creativity

JUPITER mobile stander for children is designed to merge important **rehabilitation therapy of verticalization** with the practice of **autonomy throughout movement**, having positive impact on social interaction.

AUTONOMY REPRESENTS AN IMPORTANT STEP
TOWARDS INDEPENDENCE.

TO STAND AND TO MOVE

two important concepts
combined in one device
with **numerous benefits**

TRAY

for introduction of numerous manual
activities

24" MAIN WHEEL

two big main wheels for autonomous
movement

SUPPORTS

adjustable in many directions for better
comfort of the user

SWIVEL CASTERS

have parking brakes to secure
stationary position
